

In co-operation with the East Anglian Waterways Association Ltd

Subject Repair top gates of Bacton Wood Mill Lock

Date 1st April 2018

The Plan

Remove top gates and reposition pivot bases

Work Achievement

5 volunteers attended

After looking at the gates it was decided to machine grind the wooden uprights at the hinges to try to achieve a better alignment.

Still not really happy with the fit (after this)

Laurie (Ashton) is going to try to cut a half inch strip and attach it to the gates where they come together.

As it was now raining work ceased at 1130hrs

Terry Willoughby, Work Party Leader
